

652C

Compact Top & Base Labelling Machine

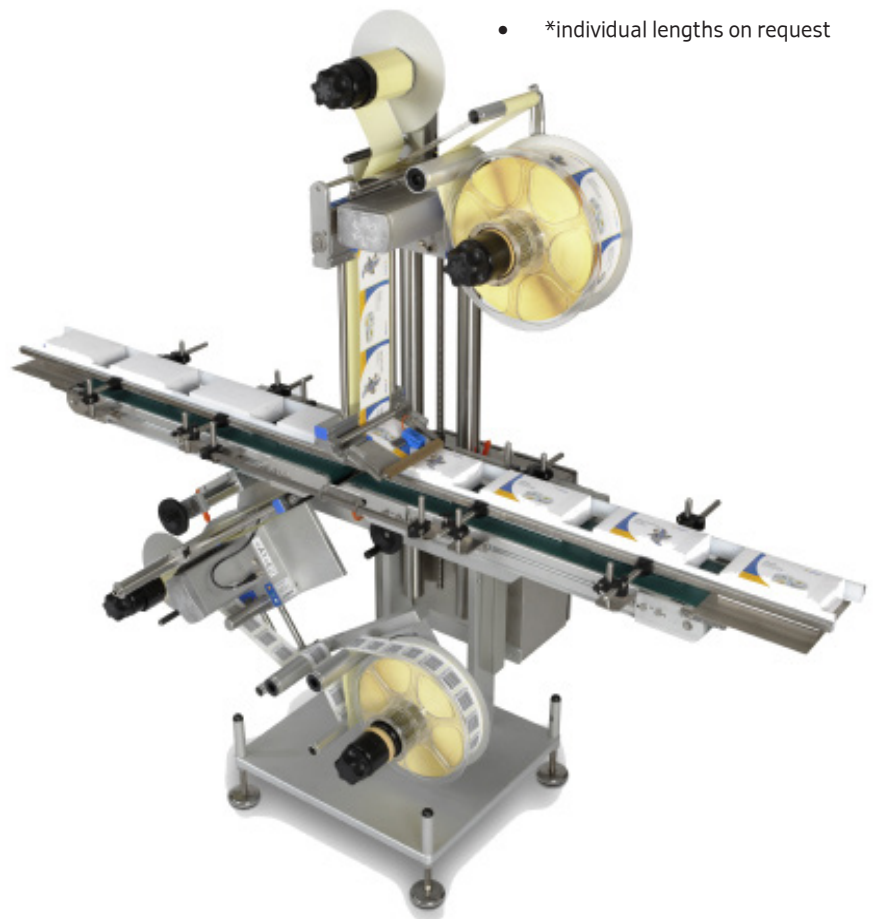

This highly efficient combination of the top 452C labeller and the bottom 552C labeller that guarantees optimum productivity and flexibility.

If both top and bottom labelling are required, the two steps can be completed in a single pass.

The HERMA 652C can also be used for top or bottom labelling only.

- Availability - Very short notice
- Applicator - The outstanding [HERMA 400](#)
- Flexibility - Available in standard lengths* of approximately 1500/2000mm or 60/80" or four standard widths; 50/100/150/250mm or 2/4/6/10"
- The 652 is also available with stainless steel construction

• *individual lengths on request

652C

Top & bottom labeller
compact and efficient

The advantages of HERMA 400 models at a glance:

- > Control integrated into the applicator - no separate control box required
- > Clearly laid out operating panel
- > Wide range power input 100AC...240V AC +/- 10%, 50 Hz...60Hz
- > Automatic synchronisation of labelling and product speeds
- > Special unwind unit giving consistent web tension
- > Comprehensive range of modules: pedestals, label sensors, printing and embossing units - always a perfect fit
- > Available as left-hand and right-hand versions, for upright, horizontal or suspended operation, width in increments of 80 mm/3" up to 320mm/12"
- > Configured for PLC connection
- > Transparent label sensing available as standard
- > Integration with the most coders/printers
