

StockAssist

Powered by **AIS Ltd**

**Maximise profitability
through accurate
inventory management**

Save money. Reduce overheads. Increase productivity.

A man in a blue polo shirt and a high-visibility yellow safety vest is shown in profile, looking down at a handheld device. He is holding a black handheld scanner with a screen that displays a list of items. The background is a blurred warehouse setting with shelves and boxes.

Every year, thousands of pounds worth of stock is thrown away because items have passed their expiry date. Both oversupply and undersupply increase overheads and decrease profit for your business.

KMsoft provide the software solution to fix this. StockAssist, our certified software solution, ensures up to the minute, accurate records of all stock locations and use.

“StockAssist provides us with accurate, real-time, information on stock level, value and location enabling us to efficiently manage our warehouse as business grows.”

**Oliver Duckworth,
Commerical Director, Windhager UK Ltd**

GS1 is an international standard used in barcoding. Already widely used within retail, healthcare, automotive and many other industries. GS1 standards enable one barcode to contain a product identification, batch number, serial number, expiry date, or over 100 other pieces of information (known as Application Identifiers) specific to an item.

StockAssist is a product by AIS Ltd, Dublin
Unit 48 Canal Walk, Parkwest Industrial Estate, Dublin 12
